PRODUCTS

- + MOV Stools
- + Shape Tables
- + Shape Desks
- + Soft Seating 3-Step, Rounds,
- + Alphabet Seating
- + Maker Space Tables

PROJECT

The Casa Grande Elementary School District is comprised of 8 elementary schools, 3 middle schools, 1 online learning academy (CGOLA), and 1 early childhood learning center (ECLC) serving approximately 6,400 students.

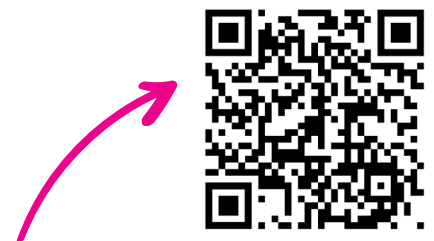

Our Vision (Est. 2018)
“A Community of Learners, Leaders, and Innovators”

DESIGN INTENT

Our intent has been to build upon the District’s mission – to not only provide long lasting, efficient spaces but to anchor the new school properly. Working closely with school and District leadership, we have developed a planning process that strives to create genuine authentic roadmap. Starting with the District’s Design Goals, we have challenged the schools to look beyond and to shift to curriculum-driven pedagogues, where integration of flexible spaces, community features, and technologies will foster and promote current and future learning.

SOLUTION

The campus plan began with consideration for the two existing schools – each deep with rich tradition (legacy). The new campus layout is orchestrated to appeal to the community therefore it presents itself in memorable approach. Referencing not only each school’s uniqueness but will ‘speak quietly’ to its historical significance.
