MS4ST30	Fixed 30"	Poly Shell

SCHOOL OF PUBLIC HEALTH

Artcobell interviews renowned ergonomist Dr. Mark Benden on the science behind movement.

DR. MARK E. BENDEN CPE
Texas A&M
School of Public Health

“

What we've found over the last few years in our laboratory here at Texas A&M and classrooms around the state is that children who are able to move, fidget, get up, walk around, stand, take a break from too much sitting still... they perform better within their own abilities. As students fatigue from sitting in one position, they seek other ways to release energy to help them stay on task. Our research has shown that when children are permitted to move (through the furniture and/or the teacher's guidance), they are less disruptive and stay on task longer.

”

Q DESIGN TEAM

NXT MOV was designed in collaboration with QDesign, the Chicago-based industrial design firm.
qdesign.us.com

RICK JOUTRAS
Design Director

TIM BUCHENBERGER
Senior Designer

“

Working on NXT MOV was not only an aspirational design challenge but a personal challenge for us. The entire QDesign team was and is invested in improving educational seating. Personally for me, as a father of three-grade school children, I was motivated to make a difference in my own children's educational experience. Artcobell gave us the opportunity and partnership to enrich the educational environment through innovative design. When a design team is able to make advancements in not only a product but also create positive change in the environment, that is the most enriching of achievements.

”

Learn more about the connection between movement and learning from Dr. Mark Benden of Texas A&M School of Public Health.

Artcobell interviews Rick and Tim from QDesign, the team that developed the NXT MOV chair.

ADAPTABLE SOLUTIONS FOR LEARNING WITHOUT BOUNDARIES

The revolutionary learning space that promotes motivation and student well-being. Desks, tables, and seating that provide limitless flexibility for students to create their optimal learning space.

NXT MOV WORK SURFACES

Mobile.
Reconfigurable.
Flexible.

Tables + desks that
work together.

A photograph of a modern, light-colored wooden desk with a curved, organic shape. It is positioned in a room with large windows. A teal chair is visible on the left, and a tall, orange, cylindrical trash can is on the right. The left half of the image is overlaid with a teal gradient.

**SHAPE
DESKS**

A photograph of a modern, light-colored wooden table with a curved, organic shape. It is surrounded by several teal and orange cylindrical ottomans. A laptop is on the table. The left half of the image is overlaid with a teal gradient.

“Ted” Side Table

This personal work surface was designed specifically for convenience and durability in K-12 learning spaces. Sturdy metal frame has a low-profile U/V-shaped base that slides easily under our Soft Seating or around the glides. Pull this down-sized work surface right up to one of our Linear or Curved Lounge Sofas or Chairs in a media center, lounge, or learning hallway.

Half Moon

The half moon’s smooth curve feels fluid and natural, making it a great way to soften the edges of a design.

Model	Size	Height
