

# Maker Space Cabinets

Maker space cabinet frame hoops are made from a one-piece 1" 14ga square steel tube that is laser cut, mitered, and slotted then welded. Lower frame cross tube is 1" 14ga square steel tube that is laser cut and tabbed into the frame hoop and then welded. Vertical center post is 1" X 2" 14ga rectangle steel tube that is laser cut and tabbed into the frame hoop and lower cross tube then welded. Cabinet main frame assembly is powder coated standard. Top panel is 14ga sheet steel that is CNC punched and formed then powder coated in marker board standard. Side panels are 14ga sheet steel that is CNC punched with a 14 X 14 peg board matrix and formed then powder coated. Bottom panel is 14ga sheet steel that is CNC punched with a 3" hole will accept a power grommet and formed then powder coated. Back panels are 20ga sheet steel that is CNC punched and formed then powder coated. All panels are fastened with six to eight #8 self-threading, tamper-resistant screws. Two options available: With Rails: Cabinet tote rails are molded in sets of three and are fastened with four #12 self-threading, tamper-resistant screws. With shelves: Cabinet shelves are made of 14ga sheet steel formed then powder coated white standard. 75mm dual-soft wheel locking casters, 3/8" - 16 x 1" threaded stem, black only.

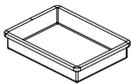

## Cabinet Accessories

### Doors

Makerspace cabinet doors are constructed from 3/4" MDF laminated on both sides. Doors have titanium painted edge finish with integrated door pull. Doors come with locks standard. Each door is equipped with two bumper pads for quiet door operation. Doors are attached with concealed cabinet hinges to the frame with #8 self-threading, tamper-resistant screws.

### Tote Trays

Injection molded poly tote trays are 16.5" long and are 12" wide, come in 3", 6" and 12" depths.

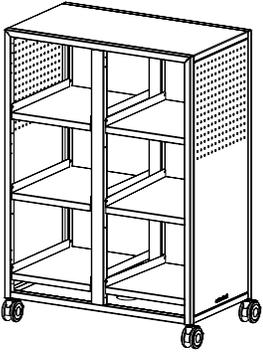

### Shelf Kit

Makerspace shelves are 1/4" white acrylic that feature dry erase compatibility on both sides with built-in handle.
