PROFESSIONAL LEARNING AND SUPPORT PROGRAMS

Purposeful and meaningful
learning experiences on the
design of and the influence on
teaching and learning

PATRICIA CADIGAN
VICE PRESIDENT OF
LEARNING ENVIRONMENTS

After 28 years in public education, Patricia Cadigan joined the Artcobell team as the Vice President of Learning Environments. Her passion for helping school leaders create engaging learning environments to support student success transcends her love for student learning.

As a school administrator for 18 years at the elementary, middle and high school levels, she observed and supported the many ways teachers teach and learners learn. But as each year clicked along, it was apparent there was a growing divide between student engagement and the delivery of content and relevant resources. Every year, it was a challenge to figure out why the best practices we had used for years in education were not holding true with today's students.

In her last assignment as a bond director, Patricia was asked to transform learning environments to meet the needs of students, teachers and the demands of changing curriculum and teaching strategies. She connected the dots between teaching, learning, and resources in the classroom. She learned firsthand that the design of a classroom truly makes a difference in how teachers teach and how students learn.

Patricia recently earned her certification as an Accredited Learning Environments Planner (ALEP). Now in her role at Artcobell, she is committed to bringing her experiences and her continued research to help schools reimagine their vision of next generation spaces. Coupled with professional development and planning workshops, Patricia “talks the talk” of schools to let them drive their decisions on how, what, when and where teaching and learning occurs in their schools.
